WHEREAS, this Agreement has been properly approved by the appropriate authority of the City and the Vendor.

NOW, THEREFORE, upon the mutual covenants contained herein, and other good and valuable consideration, the sufficiency of which is hereby acknowledged, the parties hereto hereby agree to the following:

  - a. Vendor agrees to comply with all applicable portions of Fla. Stat. 448.095. Vendor must use the U.S. Department of Homeland Security's E-Verify System, <https://e-verify.uscis.gov/emp> to verify the employment eligibility of all employees hired on or after January 1, 2021, during the term of this Agreement.
  - b. Subcontractors (i) Vendor shall also require all subcontractors performing work under

this Agreement to use the E-Verify system for any employees they may hire during the term of this Agreement; (ii) Subcontractors shall provide Vendor with an affidavit stating the subcontractor does not employ, contract with, or subcontract with an unauthorized alien, as defined by Fla. Stat. 448.095; (iii) Vendor shall provide a copy of such affidavit to the City upon receipt and shall maintain a copy for the duration of the Agreement.

c. Vendor must provide evidence of compliance with Fla. Stat. 448.095 by January 1, 2021. Evidence may consist of, but is not limited to, providing notices of Vendor's E-Verify number.

d. Failure to comply with this provision is a material breach of the Agreement, and the City may choose to terminate the Agreement at its sole discretion. Vendor may be liable for all costs associated with the City securing the same services, inclusive, but not limited to, higher costs for the same services and rebidding costs, if necessary. Any challenge to termination under this provision must be filed in the Circuit Court no later than 20 calendar days after the date of termination. If this agreement is terminated for a violation of the statute by the Vendor, the Vendor may not be awarded a public agreement for a period of one (1) year after date of termination.

4. City hereby agrees to purchase, and Vendor hereby agrees to sell or provide, the goods or services described in the proposal attached hereto and incorporated herein as Exhibit B.

5. Vendor shall deliver the goods, or provide the services, described herein no later than 9/30/2024 ("completion date").

6. This Agreement will remain in effect for a period of three (3) years with two (2) one (1) year extensions.

7. Time is of the essence in the performance of this Agreement. City shall be entitled to liquidated damages in the amount of \$500 per day, for each day after the date set forth in paragraph 4 herein that Vendor has failed to properly and completely deliver all of the goods or provide all of the services specified herein. Vendor specifically acknowledges that the foregoing sum is reasonable and does not constitute a penalty.

8. Upon Vendor's satisfactory delivery of the goods, or full performance of the services, or in accordance with the payment schedule provided in the attached proposal, City shall pay Vendor as per the Unit Prices listed in the Bid Schedule, as full consideration for goods or services provided in this Agreement and more specifically in Exhibit B.

9. Vendor fully warrants the title to any and all goods provided hereunder and agrees to defend the same against all claims whatsoever. At the time of delivery, Vendor shall furnish to the City a bill of sale absolute, with full warranties, or other evidence of title transfer satisfactory to the City, for the goods specified herein.

10. Vendor expressly warrants that all goods delivered hereunder are of merchantable quality and fit for the purpose for which the City has purchased the same. Vendor further warrants that any defects in the goods shall be properly repaired by Vendor for a period of 18 months from final delivery ("guarantee period"), including all parts and labor associated with said repairs.

11. City reserves the right to reject any defective goods, notwithstanding City's payment of the

purchase price provided herein.

12. Vendor fully warrants that all services and/or goods provided herein have been provided in a good and workmanlike manner. Vendor guarantees said services for a period of 18 months from the date of final performance. 14. Vendor acknowledges that the City may enter into agreements with other consultants or may have its own employees complete the work for services similar to the services that are subject to this Agreement.

15. Vendor shall present City with a certificate for all of the foregoing insurance, at the time of executing this Agreement and at such other times requested by the City. The Vendor waives all rights against the City, the City's consultants, separate contractors, if any, and any of its subcontractors, agents and employees, for any and all damages caused to the extent covered by insurance described herein and obtained pursuant to this Section or other property insurance applicable to the services and product provided under this Agreement. The City shall require of the Vendor, Vendor's consultants, separate contractors, if any, and the subcontractors, sub-subcontractors, agents and employees of any of them, by appropriate agreements, written where legally required for validity, similar waivers each in favor of other parties enumerated herein. The policies shall provide such waiver of subrogation by endorsement other otherwise. A waiver of subrogation shall be effective as to a person or entity even though that person or entity would otherwise have a duty of indemnification, contractual or otherwise, did not pay the insurance premium directly or indirectly, and whether or not the person or entity had an insurable interest in the property damaged.

16. In consideration of the payment of ten dollars as part of the above purchase price, Vendor shall indemnify, defend and hold the City harmless for itself, its employees, agents and assigns, from and against any and all losses, claims, damages, suits, actions, or demands, including attorneys' fees and costs of litigation through all appellate proceedings, arising from the performance or non-performance of this Agreement, whether caused in part by the City or not.

17. This Agreement shall be binding upon the parties, their successors, assigns, and legal

representatives. Vendor shall not assign or otherwise transfer any of the rights or duties under this Agreement, without the express written consent of the City.

18. This document and exhibits embody the entire Agreement of the parties. ## Industry Dedication & Education

Advanced Plumbing Technology has always put our customers first by delivering top-quality service with a partnership like approach.

To be the best partner, APT is constantly engaging in industry education for all our employees for the betterment of our customers. Our team members are actively engaged in various committees and industry specific organizations like WEF, AWWA, APWA, NASSCO, and many other national organizations as well as Florida specific organizations like FWRA, FSA, FWRC, and others.

Our Field Crew's are all NASSCO V7 Certified for PACP, MACP, and LACP with our Crew Leaders also holding ITCP Certification (Inspector Training Certification Program).

## Industry Partnerships

APT maintains several industry partners to help maintain high level accountability to our customers but choosing to do business only with partners that share our values and commitment to excellence.

These partnerships allow for us to give our customers consistency and efficiency for any pipeline project.

## Post Project Support

At APT, our commitment does not end at project completion. Part of our partnership approach is to ensure we remain available to our customers long after project completion to support any issues that may arise. While unlikely, in the event of an installation issue we are committed to responding rapidly to any concerns regardless of whether it is 6 months or 6 years post-completion.

Customer service is at the highest level of importance at APT which is what has allowed most of our business to come from negotiated project work with continued contract extensions as time and time again we have showcased the level of commitment we have to each of our customers, regardless of size or investment level.

## Core Service - CIPP

APT specializes in Cured-In-Place Pipe utilizing the water inversion method. Our methods fully comply with the ASTM F1216 specification and the team at APT has over a combined 6 million feet of CIPP installed in the ground in the United States, mostly in the Southeast region.

We install CIPP in pipes ranging from 2" – 108" in size on a regular basis and have the experience for more complex projects when required.

CIPP technology allow for minimum disruption to the public and allows for a much quicker project completion that traditional dig and replace and other methods.

For traditional felt cured-in-place pipe projects, the team at APT delivers hot water throughout the section to uniformly raise the water temperature above the temperature required to properly cure of the resin. The temperature profile is closely monitored to produce the optimum installed physical properties to ensure a long term solution to your pipeline challenges.

In certain cases, it is more practical to utilize the UV curing process which APT also specializes in. During the UV process, the liner is expanded with air pressure so that it is completely against the host pipe. Once that is completed, a string of UV lights, often referred to as the light train, moves through the liner at a certain rate of speed to ensure curing.

As previously mentioned, we have several team members that hold ITCP Certification to ensure all crew members are installing liners to meet NASSCO standards.

# Lateral Rehabilitation Program

## The Problem

According to the EPA, lateral connections make up 50% of the total length of any sanitary sewer system and are responsible for up to 75% of the I&I, yet are largely unaddressed. Millions of dollars are spent annually on treatment capacity increases and other band aids that do not address the systemic issue.

Countless case studies show that municipalities are not receiving near the reduction in I&I they hoped for through mainline only rehabilitation programs, which again showcases the laterals need to be addressed.

## Our Solution

### Lateral Lining Before or After Mainline Rehabilitation

With APT's patented and proven approach using InnerCure Technologies products, we have a revolutionary approach to be able to address the laterals before the mainline has been rehabilitated. This can save substantial funds when you are unnecessarily lining mainline pipe in good condition, simply to address the lateral.

### 360 Degree Comprehensive Solution

Simply put, the APT approach to lateral rehabilitation is a fully approach to address the main/lateral connection seal and lateral all the way to the building structure creating a jointless, seamless monolithic system.

### UV Cold Cured - Non-VOC, Environmentally Friendly

At APT, we believe in an environmentally friendly approach which is why all of our lateral rehabilitation is doing using UV cold cure technology which allows for rapid curing with zero material shrinkage, all while using a Non-VOC resin to eliminate any property owner concerns related to styrene smell or exposure.

## Key Issues - Solved!

There are key issues that a proper lateral rehabilitation program can solve. The first, addressing environmental concerns related to infiltration, exfiltration, soil contamination, etc.. The second, it simply saves your community money by addressing the systemic issue. It also addresses proper water conveyance reducing the need for plant expansions.

## Independent Study

The main to lateral connection seal that APT utilizes was independently tested by Louisiana Tech University and found to hold to pressures up to 500 PSI.

## Some of Our Services

### Pipe Cleaning

While pipeline cleaning is a relatively straightforward process, it still takes an expert team to do it right the first time.

Here at APT, we have the best personnel in the industry and a high level of accountability to ensure we meet your needs on every cleaning project.

### Inspection Services

We offer comprehensive pipeline inspection and condition assessment for pipes from 2" – 203" in diameter.

Understanding your pipeline infrastructure condition is critical to determine life-cycle analysis and potential next steps for rehabilitation based on the overall condition.

### CIPP Rehabilitation

Full trenchless pipe rehabilitation at a fraction of the cost of traditional dig-and-replace methods.

Whether you need services in small diameter laterals, sanitary sewer mainlines, or storm lines; we have your team fully covered.

### Manhole Rehabilitation

We understand the importance of this often-overlooked sewer asset. Despite manholes often being referred to as the sewer system's windows, they have been mainly overlooked for inspection and rehabilitation efforts up until recently.

APT offers a list of rehab solutions for every manhole scenario.

### Inspection Data

Data is important and so it is keeping it safe! APT uses a comprehensive data review cloud platform for inspection review and offers, as an option, unmatched 5-year post-contract data archiving for your team.

All our data complies to NASSCO standards and can be integrated into a variety of programs.

By using advanced GPS collection devices, we can give your team highly accurate coordinate data in a variety of formats supporting your GIS efforts.
