PRESENTATIONS

* Solid Waste Rate Study Presentation

Julie Leonard, Public Works Director, introduced Peter Engel, Kessler Consulting, who provided the presentation.

Mr. Engel began by explaining that the City's Solid Waste Division operates as an enterprise fund fully supported by its rates paid by the residential and commercial customers. The Division needs to maintain unrestricted reserves sufficient to cover unanticipated expenses and maintain the high-quality, reliable service it provides to customers. The last rate study, conducted in 2022, found that the City's solid waste service rates were lower than those of most peer communities. The study proposed a phased rate adjustment, which the City modified and implemented. Since that time, the financial conditions for the City's solid waste services have changed; notable personnel costs have increased, outpacing inflation; disposal costs have increased significantly; and capital outlay for fleet replacements has increased. In addition, the

Solid Waste Authority is seeking to establish a new system for recycling and disposal contracts. A decision is pending in August.

He provided a quick overview of residential and commercial collection services. Residential garbage pickup is twice a week with automated curbside service in 95-gallon carts. Recycling is once a week with automated curbside service in 64-gallon carts; bulk waste pickup is once a month. Fees are billed annually through Non-Ad Valorem Special Assessment. Commercial Dumpster collection ranges from pickup 1- 5 times a week in 2–8-yard dumpster sizes; recycling is in roll carts, and billing is monthly through utility bills. Any rate comparison with other communities must account for differences in collection services and rate-setting practices. Oakland Park is in the range of other neighboring communities.

The 2026 dumpster service rate comparison indicated that the average rates in Oakland Park are significantly less than those in neighboring communities. The comparison indicates that commercial rate increases could generate additional revenue to help cover cost increases while remaining competitive with other cities in the region.

He reviewed the financial performance history, which indicates revenues have been sufficient. The city will need significant capital to replace the fleet. He outlined the results of a residential rate comparison with other local cities.

Commissioner Lonergan asked the average age of the fleet, and Mr. Engel said 5 to 7 years was the target age before vehicles were moved from frontline to backup. He noted there was a backlog of old trucks. City Manager Hebert said the Solid Waste Authority would be important in future planning. He said this was not a recommendation at this point; in July, he would bring forward a fleet request and a plan for the CIP.

Commissioner Budhoo requested a comparison of tonnage to other cities and the impact tonnage had on fleet replacement. City Manager Hebert explained that many factors went into that decision. He noted they limited bulk trash to the size of a vehicle, reducing dumping fees. Commissioner Newbold thanked staff for the presentation and asked for clarification regarding total expenses exceeding revenue. Mr. Engel explained that a significant percentage was related to fleet replacement in 2027. Mayor Arnst pointed out that any projection past 2028 was speculation because they were not certain they would join the Solid Waste Authority and those rates would not take effect until fiscal year 2028.

Vice Mayor Gordon pointed out that the City’s rate was lower than other cities. She was looking forward to the Solid Waste Authority presentation. Mayor Arnst reminded everyone that all information was online and the meetings were public.

[* Environmental Stewardship and Sustainability Update]

Molly Ferch, Environmental Sustainability Coordinator, and Julie Leonard, Public Works Director, provided the presentation. The City's Strategic Performance areas include enhanced tree giveaways; the 10-year Water Supply Plan; water conservation outreach; aquatic plantings; maintenance and development of bioswales; and Keep Oakland Park Beautiful initiative. All performance areas are ongoing and will continue to grow every year. Current citywide initiatives and programs include: Adopt a Street; Neighborhood cleanups; tree plantings and giveaways; invasive species removals; electronic recycling; stormwater projects and outreach; roll with reusables; and Certified Wildlife habitats. She reported that 6,408 pounds of electronics from the old City Hall when it was vacated were sent to a recycling facility instead of the landfill. Staff continues to recycle electronics internally. Sustainability and IT have worked together to create standard operating procedures to recycle all internal electronics (computers, speakers, laptops, lighting, etc.) and plan to expand the initiative to the public next year.

The Storm Water Master Plan includes 14 identified capital projects; Floranada Pump Stations and Drainage Wells; Northwestern Lakes Project; Lake Tahoe; Interconnecting Drainage System ; Critical Outfall Structures (Citywide); NE 6th Avenue Pump Station; N. Andrews Avenue & Oakland Park Boulevard N. Andrews Gardens Pump Station; Tidal Valves; Replacing Flood Barriers; Protecting Sanitary Sewer Lift Stations; NE 48th and NE 15th Way/NE 16th Avenue; West Coral Lake; East Coral River. These projects are either being addressed currently or will be addressed to increase the sustainability and resilience of our drainage infrastructure. The Master Plan addresses challenges related to sea level rise, flooding, and surface water quality. The NE 6th Avenue Pump Station is fully designed and ready to be bid.

The Vulnerability Assessment will be fully completed by July 2026. In 2022, FDP developed new standards for flood vulnerability. This will help with future funding of the Florida Resilient Grant program. She provided an update on the 2019 Joint Climate Action Plan with Wilton Manors that, as of last year, includes 7 goals and 29 proposed actions. Last year, the Joint Adaptation Plan was developed to identify and implement strategies to reduce the risk of flooding and sea level rise, with particular emphasis on critical infrastructure, public assets, natural resources, and sustainability. We were awarded a Florida Resilient grant to help fund the plan. The plan will include a Private Property adaptation guidebook for single-family homeowners to easily understand how flooding affects their private property.

She introduced a heat spot analysis map she worked on during a 10-week Urban Heat Vulnerability project with NASA to identify mitigation for urban heating. Strategic greening has been taking place at City Centennial Park, an area more vulnerable to extreme heat.

The city allocates $50,000 annually to expand tree canopy. The city received a Broward County grant for trail barriers and signage improvements at Lakeside Sand Pine Preserve, which was recently completed. The improvements along with the closing of the park 6 days a week has drastically improved the native habitat.

The City has participated in the National Wildlife Federation Habitats for the past 28 years and has 198 habitats throughout the city. Six were certified this year, not including residential properties that have been added.

In our first year as a Keep America Beautiful affiliate, Keep Oakland Park Beautiful has hosted A community pollinator garden, community cleanups, and a backyard composting workshop. We also started citywide battery recycling, and the Beautification Advisory Board is hard at work on the projects.

Commissioner Budhoo requested education and outreach to increase recycling. Commissioner Newbold asked about the Sand Pine rehabilitation, and Ms. Ferch said the restoration was ongoing. Commissioner Lonergan thanked all the volunteers who were helping with the restoration. Ms. Ferch informed Mayor Arnst that they had relocated the feral dogs and there were no burrowing owls, but there were gopher tortoises.

1. **PUBLIC COMMENTS**
At this time, any person will be allowed to speak on any matter that pertains to City business for a length of time not to exceed four minutes per person.

Wallis Peterson, 1941 NW 36th Street, shared concerns about a lack of transparency. She said Commission members often forwarded residents' concerns to staff, but staff did not forward responses to residents, and requests were being ignored. She stated her gratitude to Heidi Burnett and said she would be missed.

Chris Fischer, 3711 NE 13th Avenue, recognized the tremendous progress being made on Greenleaf Park. He then spoke about City Manager Hebert's annual review and compensation. He expressed his concerns regarding a lack of transparency with the public. He suggested the City initiate a regular "Coffee with the City Manager" event once per month.

Eric Peterson, 1941 NW 36th Street, spoke on City Manager Hebert's performance and compensation and asked that it not be increased. He shared a copy of a report commissioned from HRCC Consulting recommending City Manager Hebert's compensation be maintained or increased and also recommending additional perks. Mr. Peterson said City Manager Hebert was already the highest paid City Manager among the nine comparable Broward County cities.

Robert Taflinger, 3605 NE 19th Avenue, said he was an LGA graduate and asked about the City's plan to address the reduction in property tax if the ballot initiative passes.

Stacey Norcross, South Oakland Forest Drive, urged the City Commission to reject any proposal to increase City Manager Hebert's compensation. She pointed out that the City's annual contribution to City Manager Hebert's retirement was over $100,000, more than the annual salary of many Fire Rescue personnel. She also reminded everyone that the proposed property tax reduction could significantly impact the City.

RESOLUTIONS AND MISCELLANEOUS

(Item 6 was pulled from the Consent Agenda under Additions/Changes/Deletions)

6. **Agreement with Amici Engineering Contractors LLC for Galvanized Water Service Line Replacements.**

Julie Leonard, Director of Public Works, presented that the city has over 1,600 aging galvanized service lines for potable water. The city's water service line is between the water main and the customer's water meter. Galvanized lines are susceptible to corrosion, reduced water quality, service disruptions, and increased maintenance needs.

Commissioner Lonergan moved to adopt the resolution. Commissioner Budhoo seconded the motion, which prevailed by the following vote:

YES: Commissioner Newbold, Commissioner Budhoo, Commissioner Lonergan, Vice Mayor Gordon, Mayor Arnst

The resolution, as adopted, carried the following title:

11. City Manager Performance Evaluation 2026

City Manager Hebert reminded the City Commission that this was not an action item. Commission members each stated they have ongoing discussions with the City Manager as issues arise and are satisfied with his performance.

11A. Horizon Extension Request - 16th Amendment to the PSA with Horizon Oakland Park, LLC for the acquisition of Downtown Properties.

City Manager Hebert reported that this was a four-month extension and would continue it through November 2026. Any additional changes would require a neighborhood participation meeting, an application for a change to the building plan, a DRC review, and a more complete change to the development agreement. It would also include a $350.00 non-refundable contribution towards the purchase price.

Alphonso Costa Jr., COO of the Falcone Group, Developer of Horizon of Oakland Park, said the project had been four years in the making and reported that Greenleaf Park would be completed this summer. He stated that after review, they would need to conduct a neighborhood participation meeting and return to the DRC and City Commission for approval. He said they were just asking for more time to ensure the final delivered project was best in class. He was committed to the project and did not believe they would request another extension.

Commissioner Budhoo asked about adding additional affordable units if they could get more funding from Broward County, and Mr. Costa said they would be open to that.

City Manager Hebert noted their partnership with the County had been generous but did not have a nexus with the affordability component. He said the City's CRA did not have Tax Increment Financing (TIF). He stated he and Mr. Costa had discussed the possibility of increasing the number of affordable units, but they could not commit to it at this time.

Commissioner Lonergan thanked Mr. Costa for his continued partnership with the City. He asked about the impact the delay would have on parking, and City Manager Hebert said the fencing should go up at the end of the year, close to the end of the 13th Avenue project. Vice Mayor Gordon said the good faith deposit showed intent.

Commissioner Lonergan moved to adopt the resolution. Commissioner Newbold seconded the motion, which prevailed by the following vote:

YES: Commissioner Newbold, Commissioner Budhoo, Commissioner Lonergan, Vice Mayor Gordon, Mayor Arnst

The resolution, as adopted, carried the following title:

RESOLUTION R-2026-076
